-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 January 2005.
 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4, 7-10, 13-28, 30, 31, and 33-39, are rejected under 35 U.S.C. 103(a) as being unpatentable over Toriumi (6,062,868) in view of Hasegawa (6,570,080).

Toriumi discloses an apparatus and method for transmission and reception of music data as well as image data, wherein the music data includes melody data as seen in figure 1. Music data and image data are transmitted to a server (33 and 32 respectively) wherein the server includes a receiver for receiving the data. The server imparts additional data into the music data as well as the video data as discussed in column 5, lines 1-40. The additional data is a parameter. New content data is created by the additional data, wherein the addition provides a conversion. Figures 1-3 provide views of the apparatus and operation. Although, it is inherent that there is bi-directional communication between the client and server, the reference does not use the word "client".

However, Hasegawa et al. discloses a client terminal coupled to a server over a bi-directional communication network, the client terminal (2) comprising: an input device for inputting melody including content data (column 5, lines 7-26); a transmitter (figure 9A) operatively coupled with the input to transmit the melody information to the server

and a receiver adapted to receive content information from the server and melody information transmitted to the transmitter (column 14, lines 63 through column 15, line 63).

Melody is inputted into the apparatus. Melody is a series of notes or note data.

It would have been obvious to one of ordinary skill in the art at the time of the invention to utilize the teachings Hasegawa et al. (6,570,080) with the apparatus of Toriumi, because the combination clearly provides transmission of melody data between a client and a server, wherein Toriumi further provides data added to the transmission.

Allowable Subject Matter

3. Claims 5 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments filed 1/26/2005 have been fully considered but they are not persuasive.

The applicant argues the differences between the present invention and the prior art. While some of the arguments are strong, they are not reflected in the claims. For example, language found in claims 5 and 11 are argued, but are not written in an allowable manner. Claims 5 and 11 were objected to as having allowable subject

Art Unit: 2837

matter. The claims are written in a broad manner and are interpreted as such. Based on the claimed limitations, it is believed that the present claims do not defined over the prior art. Therefore, the rejection is maintained.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
